Structured Programming Language Laboratory

Summer 241 CSE 1112

Home Assignment

Marks : 20

You are tasked with designing an **Employee Record Management System** using **structures** and **functions** in the C programming language. The system will allow users to:

- Add new employees
- Update employee information
- Delete employees
- View employee details

Each employee will be represented by a **structure** with the following attributes:

- **Employee ID** (Integer)
- **Employee Name** (String)
- **Employee Position** (String)
- **Employee Salary** (Integer)

Functionalities (Details)

Add New Employee:

The system should allow the user to enter the employee's name, position, and salary.

Update Employee Information:

The user should be able to update an employee's details by providing the employee ID and the updated information (name, position, or salary).

Delete Employee:

The user should be able to delete an employee by entering their employee ID. Once deleted, the program should confirm the deletion.

View Employee Information:

The user should be able to view an employee's details by entering their employee ID. The system should display the employee's name, position, and salary.

Exit the Program:

The user should have the option to exit the program.

Sample Input / Output

Press 1 to Ad New Employee

Press 2 Update Employee Information

Press 3 Delete Employee

Press 4 View Employee Information

Press 5 Exit Program

1

Give employee information

Enter employee ID: 1

Enter employee name: Sakib

Enter employee position: Manager

Enter employee salary: 50000

1

Give employee information

Enter employee ID: 2

Enter employee name: Tamim

Enter employee position: Trainee

Enter employee salary: 10000

1

Give employee information

Enter employee ID: 3

Enter employee name: Rahman

Enter employee position: Developer

Enter employee salary: 100000

2

Enter employee ID for information update: 1

Enter new name (leave blank to skip):

Enter new position (leave blank to skip): Senior Manager

Enter new salary (leave blank to skip): 55000

Employee information updated successfully:

ID: 1, Name: sakib, Position: Senior Manager, Salary: 55000

3

Enter employee ID: 2

Employee with ID 2 has been deleted.

4

Enter employee ID: 3

Employee Information:

Name: Rahman

Position: Developer

Salary: 100000

5

Exiting program...

*****Note**: Do not copy code from any source or friend. Any kind of plagiarism will be strictly punished (may even result in negative marks).

*****Submission Guidelines**: Full code is a single program. So submit the .c file only. Any exception to this guideline will result in reduced marks.

***Submit the assignment before the deadline.
