Sec- P

Mid Assignment

1. Print the given pattern using Nested Loops

5

Sample Input	Sample Output
7	<pre>ZZZZZZZ Z Z Z Z Z Z ZZZZZZ</pre>
5	<pre>ZZZZZ Z Z Z Z ZZZZZ</pre>

2. Find the Second Largest Number (Using Array)

5

Sample Input	Sample Output
Array size: 10 45 32 67 89 21 34 99 34 56 12	The second largest number is 89
Array size: 5 5 10 2 12 15	The second largest number is 12

3. Find the solution using 2D Array

5

WAP that will take (m x n) integer inputs into a matrix of dimension m x n. Your task is to find the **product** of all the elements that lie on the border of the matrix. The border elements are those that are located in the first row, last row, first column, and last column of the matrix.

Sample Input	Sample Output
3 4 1 2 3 4 6 7 8 9 11 12 13 14	Product is: 31135104
5 4 1 2 4 5 3 1 5 8 2 3 10 11 5 2 15 3 1 4 7 5	Product is: 44352000

*****Note:** Do not copy code from any source or friend. Any kind of plagiarism will be strictly punished (may even result in negative marks).

*****Submission Guidelines:** Place all 3 .c files in a folder. Zip the folder and submit the zip file(.zip) only. Any exception to this guideline will result in reduced marks.

***Submit the assignment before the deadline.
